## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fukasawa et al.(6,914,267) in view of Wilson(6,299,328).

Figure 12 of Fukasawa discloses a reflective member(48) formed of a fluorescent material(21) that is excited by a light beam(20) to generate a light beam having a greater wavelength than the laser beam(col. 6, lines 17-21), and a protective plate(33) for covering the semiconductor chip(20) and the reflective member wherein the laser beam emitted from the laser chip is reflected by the reflective member and converted into the light beam having the greater wavelength.

Fukasawa does not disclose a semiconductor laser chip that emits a laser beam.

Wilson discloses a semiconductor laser chip which emits a purple-blue laser beam(col. 5, lines 20-23) to excite a fluorescent material.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use the laser disclosed in Wilson in place of the light source in the device disclosed in Fukasawa to excite a fluorescent material as disclosed in Wilson.

***Allowable Subject Matter***

3. Claims 1, 3, 5-9 and 11-16 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter.

The limitations that are primarily responsible for distinguishing the claims of this application over the prior art are the limitations concerning the protective plate allowing the light beam to pass there through and prevents the laser beam from passing there through.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
